PROFESSIONAL SUMMARY

Python and AI enthusiast with a strong foundation in Machine Learning, Data Analysis, REST API Development, and Full Stack Application Development. Experienced in developing AI-powered applications using Python, Flask, Scikit-learn, Pandas, NumPy, React, and SQL. Passionate about building scalable AI solutions and continuously learning emerging technologies in Machine Learning, Natural Language Processing, and Generative AI.

EXPERIENCE

Inlighn Tech — Full Stack Development Intern

March 2025 – August 2025

- Developed responsive web applications using React.js, HTML5, CSS3, JavaScript, Node.js, and Express.js, implementing reusable components and RESTful APIs to improve application performance and maintainability.
- Collaborated in Agile development, utilizing Git, GitHub, version control, debugging, and code reviews to deliver scalable and high-quality software solutions.

Techpanda — Advanced Generative AI Program

June 2026 – August 2026

- Completed hands-on training in Python Programming, Data Analysis, Machine Learning, Deep Learning, Natural Language Processing (NLP), and modern AI development workflows.
- Gained practical experience in Prompt Engineering, Large Language Models (LLMs), LangChain, Hugging Face, Retrieval-Augmented Generation (RAG), AI Agents, Flask, and FastAPI through real-world assignments and projects.

AI Intern — Internship Studio

July 2026 – September 2026

- Worked on Artificial Intelligence concepts, Python programming, and machine learning applications through hands-on assignments.
- Developed AI-based mini projects and gained practical exposure to model development, data preprocessing, and problem-solving.

PROJECTS

ThreatGuard – AI Cyber Threat Intelligence & Auto-Defense System

2026

Python • Flask • React • SQLite • Gemini API

- Developed an AI-powered Cyber Threat Intelligence platform integrating AlienVault OTX and Google Gemini API to collect, analyze, and summarize real-time cyber threat intelligence.
- Designed REST APIs, implemented threat scoring, role-based dashboards, and automated response workflows to enhance cyber threat monitoring and analysis.

Multiple Disease Prediction System

2023

Python • Scikit-learn • Pandas • NumPy • MySQL

- Developed a machine learning application using Logistic Regression and Random Forest algorithms to predict multiple diseases from patient health data.
- Performed data preprocessing, feature engineering, model training, and evaluation to improve prediction accuracy and model performance.

EDUCATION

B.Tech – Information Technology | Kumaraguru College of Technology

Nov 2022 – May 2026

CGPA : 8.0 | Relevant Coursework : Data Structures, DBMS, Web Technologies, Machine Learning, Data Mining, Software Engineering.

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript, Java, PHP

Frameworks & Libraries: Numpy, Pandas, Matplotlib, React.js, Node.js

Databases: MySQL, MongoDB, SQLite

DevOps & Tools: Docker, Jenkins, postman, Git, GitHub, Apache (XAMPP)

CERTIFICATIONS

- Web Development (HTML, CSS, JavaScript, React) – Coursera
- AWS Cloud Foundations – AWS Academy
- Advanced Generative AI Program – Techpanda
- Artificial Intelligence Internship Certificate – Internship Studio
